INFR 3120 Project Part 1 – Hall of Champions

Summary

A website where users can add/edit/delete wrestlers and compare their stats which are showed in a table.
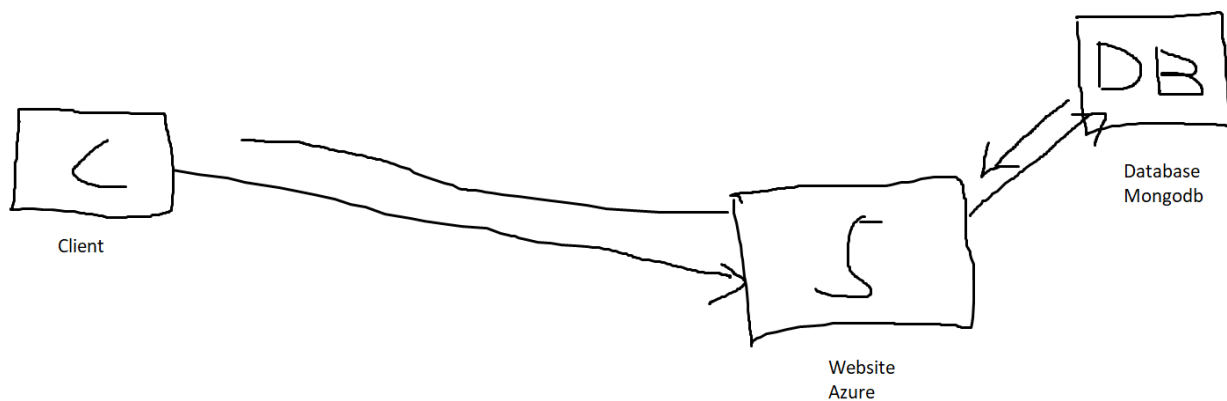

Functionality

C – Create

R – Read

U – Update

D – Delete

Technologies Used

- Node JS/express-js
- Mongodb/mongoose
- Azure

System Design

The website is hosted on Azure cloud platform and is connected to a mongodb database which holds the wrestler data. The landing page shows the data in a table and there are options to add, delete or update a wrestler (CRUD operations).
